TELECOMMUNICATIONS

Supra 300AT AutoDial/AutoAnswer Modem for all Atari computers. Complete package with Smart Terminal Software on disk.

Supra 1200AT 1200/300 Baud AutoDial/AutoAnswer Modem for Atari 8 Bit computers. Plugs into SIO port. Hayes compatible. Complete package with Smart Terminal Software.

Omega Terminal
Features icons and pull-down windows. Works with Atari Mouse and Joysticks.
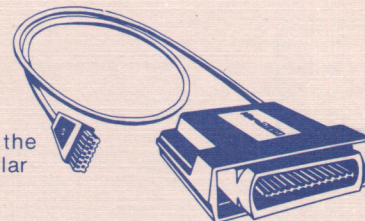

Works on all Supra Corp. Atari Modems and other Atari Modems. X Modem compatible with CompuServe. Automatic LogOn capability. Allows up to 100 phone numbers in memory. Save any screen in memory with "snapshot." A full featured- 100% machine language terminal program.

Modem Driver Program
R1 : Device emulator for Atari computers using MPP-1000C and Supra 300AT modems. Emulates Atari 850 interface and Hayes Smartmodem. Allows users to write their own communication software or modify existing software.
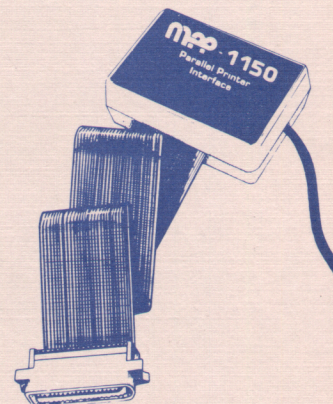

INTERFACES

MicroPrint Printer Interface for all Atari computers except the 1200XL, and most popular parallel printers with Centronics 36-pin connector.

MPP-1102 Adapter Cable for our printer interfaces which allows use of printers with 40-pin card edge connectors (Atari 825, Centronics 735/739).

MPP-1106 Adapter Cable for our printer interfaces which allows use of IDS printers with 25-pin connectors.

MPP-1150 Printer Interface for all Atari computers and most popular parallel printers with Centronics 36-pin connector. Allows daisy chaining of other peripherals. Note: When ordering for the Atari 1200XL computer, ask for MPP-1151 Printer Interface.

MPP-1156 Serial Adapter for the MPP-1150, MPP-1151 Printer Interfaces, and the MicroStuffer 64K PrinterBuffer. Allows use of many popular serial printers.
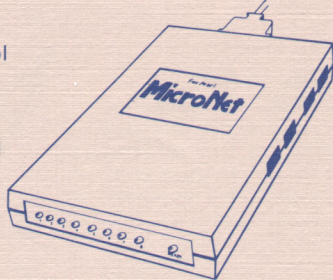

Supra Corporation

1133 Commercial Way / Albany, Or 97321 / (503) 967-9075-Orders / (503) 967-9081-Technical Support

A T A R I

MicroNet
Network up to 8 Atari computers to provide enormous savings for school systems and computer labs. Allows sharing of printers, Disk Drives, and Modems. Comes with modified ATARI DOS 2.5 to support busy disk retry and works with all Atari computers.

MicroPort
Parallel Buss Board
This unit is designed as an experimenter's board for the Atari XL and XE (with adapter) computers.
Comes with PIA (20 Input/Output lines), power supply and 10 square inches of prototyping area.
Includes instructions for building a clock and an EPROM Burner.

Assault Force
Exciting new "real" 3-D Graphics on 48K Disk. Includes Super Charger Power Booster cartridge for fast realistic 3 dimensional graphics. Weave your way through a maze of pyramids and radar dishes as you fight against an onslaught of jets and helicopters. But, remember to keep an eye out for more fuel in this fast paced game.

MicroFiler
Easy to learn and use **Home Data Manager** on convenient cartridge. Data can be stored on either disk or tape.

ST PRODUCTS

**Supra 300ST
300 Baud, AutoDial
/AutoAnswer Modem** for Atari ST computers. Includes Omega Terminal Software.

**Supra 1200ST
1200/300 Baud
AutoDial/AutoAnswer
Modem** for Atari ST computers. Plugs into serial port. Hayes compatible. Complete package with Omega Terminal Software.

**Supra Drive ST
Hard Disk Drive System** Offers 10, 20, 30 and 60 megabytes of hard disk storage for the Atari ST. Drive connects to the ST's DMA peripheral buss, offering very high speed data transfer rates. Is completely compatible with Atari ST and other DMA Buss Devices. Includes Hard Disk Utilities.

A T A R I

SupraDrive AT
Hard Disk

**Supra Drive AT
Hard Disk Drive System**
A complete 10 megabyte
hard disk package
including the following:

> Interface
> Hard Disk Controler
> Power Supply
> Hard Disk (10 meg)
> Case
> Cable
> Special Hard Disk DOS (on disk)

The hard disk is driven by the parallel port on the Atari XL and XE (with adapter) computers and allows VERY FAST disk access as well as the convenience of having massive amounts of room for programs and files on one disk. The MPP Hard Disk Adapter and the SPECIAL HARD DISK DOS treat the Hard disk as TWO disk drives. These are drives 1 (which can be configured as a single or double density drive) and drive 3, which has over 38,000 free sectors when formatted. The system normally will boot from DRIVE ONE, but can be made to boot from DRIVE TWO, (a normal floppy disk drive connected through the SIO port, this disk drive is not included in package).

Interface also includes port for a parallel printer. Both hard disk and parallel port interface have 8,000 - 10,000 bytes per second transfer rate.

Hard Disk Interface (includes DOS on disk)
For the "Do-it-yourself" technically competent computer user who would rather assemble their own system.

Works on Atari XL or XE (with adapter). Includes High Speed Parallel Printer interface.

You supply Hard Disk (5-15 meg)
You supply Hard Disk Controller-XEBEC compatible
You supply Power Supply
You supply Case
You supply Cables

XE to XL Adapter
Gives Atari XE a standard XL parallel buss interface (PBI). Includes cartridge socket.

Also for use with Hard Disk Drive Interface and MicroPort on Atari XE computers.

Commodore

MPP-1064 AutoDial/AutoAnswer Modem for Commodore 64 computers. Works with most terminal programs.

Advanced one chip modem design for extremely reliable data transmission.

Includes Public Domain Terminal Software.

MicroFiler
Easy to learn and use **Home Data Manager** on convenient cartridge. Data can be stored on either disk or tape.
